

How to Fight Communism

Advice from a veteran Communist-fighter

The Communists never worry about anti-Communist speeches, as long as nothing concrete is done to expose and defeat them further, following a meeting.

For over 20 years I have gone up and down our Nation warning millions of the menace of Communism and its threat to our way of life. In every meeting I realize that the majority of the listeners are shocked and awakened and feel at the time that something should be done to halt the encroachment of Communism into our way of life—yet this challenge is soon forgotten as time erases it from their minds. There is only a small majority, a chosen few, who accept their responsibilities to the challenge and devote their lives to the preservation of our Christian heritage and freedom.

In all history, there has been a devoted few who have turned the tide and have preserved the high ideals. They accept their task, because they were willing to dedicate their lives, their fortune and their sacred honor. They were willing to do the menial things which are always a part of the greater accomplishment.

It is our hope and prayer that we may be able to alert you to what can be done to help preserve our liberties, and with this thought in mind, we present the following proposals.

1. STUDY. Buy and read as many books and periodicals which will educate you concerning the enemies operating in our land as possible. Lend them to your friends and keep a card index system so that you know what books of yours they have read.

Place these books in your local library, in your school libraries and your church libraries. Step into your local book store and suggest that they sell them along with their other books.

You can produce greater interest on the part of your bookstore dealer locally by having them order the book for you. Usually they will order several copies at the same time.

2. ORGANIZATION. Your second project is one of creating an organization. Through it you can fulfill a greater task in the community.

Call a meeting in your home of at least six, who know the issues like you do, and set up a "club." The name doesn't matter. It can be "Committee of Correspondence." It can be "Constitution Club" or any other name which you feel like setting for your local endeavors. If you wish to call it "Soldiers of the Cross" we will issue to you a Charter and Membership Cards.

Elect three officers, or as many as you so desire, but be sure to have a President, a Secretary and a Treasurer. Then assign each member to a Committee.

There should be a committee on local action, legislation, communications, books and one on programs.

At each meeting, your order of business could be run something like this:

Call to order

Prayer

Pledge to the American Flag

Singing of the National Anthem

Report of the Secretary and Treasurer

Report of Committees

Book Reviews

Future Action
Prayer and Dismissal

3. ACTION.

(a) Telephone Committee

It is always expedient to have a Telephone Committee made up of from five or more people who are willing to call five others and notify them:

Concerning patriotic meetings in the area

Concerning legislative action which is coming up

Concerning a protest against certain statements made on the radio or television

Concerning important articles that they should read in newspapers or periodicals

Concerning writing to "The Voice Of The People"

Or, other matters pertaining to the Crusade.

(b) Letter Writing

The trouble with most patriots is that they spend too much time writing one another and not enough time in using letter-writing to educate the public. At your meetings you can gather together vital information in the form of tracts and periodicals and address them to certain sections in your community, if you cannot afford to cover the full area. Each year, there is a local street directory put out by the telephone company, which you can rent or buy outright. Your areas can be picked from the directory which will contain the correct mailing addresses. It is preferable that the letters be sent sealed, first class, with no return address.

At each meeting the letter committee can prepare letters to your state legislature or the National Congress on vital Bills which you either are supporting or opposing. These should be sent Air Mail-Special Delivery as they will have a better effect on the congressman or legislator. If time is a factor, then send telegrams, or call your congressman and let him know that there are others personally from the committee meeting

there who feel the same as you do. Get on the mailing list for Liberty Lobby, in Washington, so that you will be quickly notified of important bills before Congress.

The letter-writing committee could be used to write letters of protest to the press and letters of praise and support to patriots who are holding the fort.

Letters to the editor of your paper can be framed by this committee. They ought to always be simple and right to the point, with phrases that will catch the reader's eye. "Voice of the People" articles are well read and the enemy on many occasions have used these columns to sensitize the reading public. We can do the same. It is always well to have some friends or patriotic organization in our nation's capitol or in the state capitol that will give you information on pending legislation. Remember this: "Letter writing was one of the most important factors in the American Revolution."

4. DISTRIBUTION OF LITERATURE.

One of the main faults of our patriots is that they buy a great deal of patriotic literature which they place in the hands of other patriots. This literature ought to be placed in the hands of the general public.

Smaller tracts and pamphlets can be sent to various areas through the letter committee, but it is far better that you select certain individuals that you can propagandize over a period of a year or more.

Doctors

Members of your City Council

Pastors

Bankers

Teachers

Members of the Chamber of Commerce

And others who have influence over many should be reached.

You will find that if you subscribe to a patriotic magazine like THE AMER-

ICAN MERCURY for your pastor or a civic leader, it will produce more valued results than being promiscuously distributed. If your club can afford it, it is good to get a number of copies of these better-looking magazines and place them in public gathering places. In most instances you would not have to ask. Drop one on the reading table in the waiting room of your doctor's, dentist's or lawyer's office. There are many other businesses which have reading tables. Slip a few on the news stand, then people seeing them there will purchase them from the news dealer and will demand one next month of these copies which news-dealers have, and he will then have to order them, or else incur their ill will. If you are traveling by train, bus or airplane, drop a few in the seats. Place a few systematically in railway stations, bus and air depots. On the train, it is far better to put them in the lounge car or in the sleeping berths.

With magazines like THE AMERICAN MERCURY, many times you can set up a group of young people who will sell them house to house for a commission just as news-carriers sell the *Post* and *Ladies' Home Journal*.

5. PICKET ACTION.

A devoted few of not less than seven or more than thirty out of your club should be assigned to "picket duty" and when a Communist or pro-Communist speaks, or films appear in your community, a "picket line" should be formed. You can buy the poster card at any stationery store and put the writing on with little tubes that are called "Magic marker" or some other similar name. The sign should always tell your story, so that when pictures are taken by the paper they will carry a message to the public. Always call the press concerning your picket line and give them a formal statement, which embodies the reasons why you are protesting. This has been proven to be a successful means in exposing and defeating the enemy across the nation.

6. POLITICAL ACTION.

Be sure to place members of your committees in important civic, educational and political groups where they can be a listening ear to what is transpiring in the committee; where they can sensitize the people to the patriot's position on the issues; and where they can protest the enemy's infiltration into these groups.

Get a list of every political precinct of the parties in your city, but get your members into each precinct meeting. This may seem like a major task but in most instances, the precinct committees have only from two to ten membership and these precincts can easily be captured by our side, as they are the ones who decide on who goes to the county, district and state conventions and finally to the national convention. If this would be done quietly, the political parties of our nation could be captured by our patriots and the victory for true Americans could be won!

In the educational and civic groups you can recommend good books and good films for them to use in their projects. You could record the granting of a plaque or some prize to a student who gives the best speech or writes the best essay on our Constitution, or against Communism. This not only will interest the students, but will educate them in our way of life.

7. PRO-AMERICAN DAYS.

Your own club or others in which you have representatives ought to see to it that every important American holiday is promoted, such as special rallies in schools and churches and at civic centers on Lincoln and Washington's birthday, Memorial Day, the 4th of July, etc. On October 23, the day before the United Nations day, you should set it aside as United States Day. Write to the governor and mayor and have him proclaim that day in honor of our American way of life. This has been done in many communi-

ties with real success. Our office can tell you where you may buy flagstickers to put in the store windows which should have written on them, "I pledge allegiance to only one flag — Old Glory." You will find that the merchant will be scared to death to turn you down. Do not leave the sticker with him. Stick it in the window of the store right while you are in the store. If you can afford it, little plaques can be given away to the school children on that day, and may be small reprints of the Constitution and the Bill of Rights. Many companies, like the John Hancock Mutual Life Insurance Company, Boston, Massachusetts will send you free of charge in quantities, in booklet form. *George Washington, The Pilgrim*

information available to the Commission. CIA experts have given their opinion that the handwriting on the visa application which purports to be Oswald's is in fact his and that, although the handwritten notations on the bottom of the document are too brief and faint to permit a conclusive determination, *they are probably Senora Duran's*. The clothes which Oswald was wearing in the photograph which appears on the application appear to be the same as some of those found among his effects after the assassination, and the photograph itself appears to be from the same negative as a photograph found among his effects. *Nothing on any of the documents raises a suspicion that they might not be authentic*. By far the most important confirmation of Senora Duran's testimony, however, has been supplied by confidential sources of extremely high reliability available to the United States in Mexico. The information from these sources establishes that her testimony was truthful and accurate in all material respects. The identities of these sources cannot be disclosed

Fathers, Patriotic Songs" and many other booklets of patriotic interest.

8. PROJECTS

It is quite easy for individuals or committees to secure time on your local radio station for the playing of Anti-Communist and pro-American tapes. Our office has many one-quarter hour, one-half hour and one-hour long tape messages, given not only by myself, but other Anti-Communist speakers.

We also can rent films and film strips to you concerning the Communist intrigue, such as *Communism on the Map* and *Operation Abolition*. It is good if once a month you can have a showing of an Anti-Communist or patriotic film, or a book review to which you may invite a larger listening audience.

without destroying future usefulness to the United States.¹¹

Where Is The Membership Card?

If the Commission is so pleased with the high reliability of the testimony offered by Senora Duran, where are the documents showing Oswald's Communist Party membership? The Commission said these "documents" were found among his possessions after his arrest. But they are not offered as exhibits any place in the Hearings or in the *Report*. Have they been secreted securely in the National Archives along with all other data that the Warren Commission considered unfit for public consumption?

But now we know that Oswald was a card-carrying Communist Party member!

In spite of the Warren Whitewash!
